

Media Server System

Media Server System

A Media Server System stores DVDs and music from iTunes and CDs onto central servers hard drives, where that content is then made available independently to movie and music players, in various areas within the system.

- **Easily Find A Movie**
- **Eliminate Scratched DVDs**
- **Uncompressed CD Music**
- **Intuitive Use**

The Kalidescape System puts your entire library of movies, music concerts, and music at your fingertips.

Easily enjoy 1080P playback with family and friends anywhere in your home. Search by cover-art, alphabetical or genre. The system features parental control for movies you want out of reach of the children.

The entry system, populated with 4 TB drives, can store up to 450 DVD's, 4950 CD's, or a combination of both. Expandable by 14 times capacity, up to 6,000 DVD's
