

Shading Solutions

Shading Solutions

Shading Solutions are automated window treatments that control the amount of sunlight that enters a room, which is operated by the touch of a button on a wall-mounted keypad or a handheld remote.

- **Green - Energy Saving**
- **Reduces Solar Heat**
- **Eco-friendly Fabrics**
- **Simple To Operate**

Shading Solutions include roller shades, drapery track systems, skylight shades, and Roman shades. All operate with ultra-quiet precision, low-voltage drives, and offer many options for fabrics and controls. Systems vary in size, from a single window to the entire property. Shading Solutions can be integrated with the Control/Automation System and Lighting Control System for the ultimate **Green** experience.
