(Any Television in the House)

(View from your Laptop)

(Access via your Cell-Phone)

Surveillance System

The Surveillance System provides a means of remote monitoring of an area in, and/or around, the property.

- **Home Security**
- **Monitor Swimming Pool Activity**
- **Audio/Video Recording**
- **Easy To Use**

A Surveillance System can be designed to provide access to remotely located cameras. The cameras maybe be viewed from any Television in the home, from your PC, Laptop or Smart Phone via the Internet.

The Digital Video Recorder (DVR) can record activity based upon real time or via a motion trigger which maybe stored for future use or accessed over the Internet.
